INTRODUCTION

This working paper is the second in a series of bibliographies about Canadian direct investment abroad. The first was "Canadian Investment Abroad - Selected Bibliography, 1956 to 1968", which was issued in June 1969. It was updated by Addendum No. 1 (1970) in March 1970 and by Addendum No. 2 (1972) in March 1972.

This working paper supersedes the previous one and its addenda. It contains material examined up to the end of June 1972.

The bibliographies of the Foreign Investment Division are built up on a day by day basis, as the literature is covered in the normal course of work. They make no claim to be either exhaustive or definitive. As the by-products of covering a subject field for practical purposes, they have been found useful by many outside the Division. New versions and amendments are issued whenever enough new material has accumulated to make it worthwhile. The work is done in close co-operation with the Library.

The Foreign Investment Division maintains two other bibliographies within its field of interest. One of them is "Foreign Direct Investment in Canada - Selected Bibliography to March 1972". The other is "The International Enterprise - A Selected Bibliography to May 1972".

Some material is found in more than one bibliography. For instance, an item may be listed here and also under the international enterprise, if the contents make this appropriate.

HOW THE LISTS ARE ARRANGED

General

The contents of this bibliography are presented in four sections:-

- I. Canadian statistical documents.
- II. Books and documents.
- III. Articles.
- IV. Speeches and statements by Canadian Cabinet Ministers.

Canadian statistical documents

The Canadian statistical documents included in this bibliography were all published by Statistics Canada or by its predecessor, the Dominion Bureau of Statistics. Consequently, they are all listed under the heading Canada. Statistics Canada.

The individual documents are listed alphabetically and numbered. The first entry reads "1. Canadian Balance of International Payments, 1926 to 1948. 199 p. (Catalogue No. 67-501)". This is a document published by the Dominion Bureau of Statistics entitled "Canadian Balance of International Payments, 1926 to 1948." It contains 199 pages. The catalogue number is 67-501, and this can be used for identification purposes by a reader who is looking for the volume.

Books and documents

Books and documents are entered in alphabetical order. The surname of the author or the editor is the preferred indicator. This is followed by given names or initials. After the author's name comes the title of the book, the place of publication, the name of the publisher, and the number of pages in the book.

An example of a standard reference to a book is:-

Paquet, Gilles. Editor. The Multinational Firm and the Nation State. Don Mills, Collier-Macmillan Canada, 1972. 182 p.

This reference is to a book edited by Gilles Paquet called "The Multinational Firm and the Nation State," published in Don Mills by Collier-Macmillan Canada in 1972. It has 182 pages.

When there are several authors, the indicator for the main entry is the surname of the author who is listed first in the book. The names of the other authors also appear in the citation. A separate entry is made for each of the other authors, with a cross-reference to the main citation.

In the case of a government publication, the indicator for alphabetical purposes is the name of the country. This is followed by the name of the department responsible for the publication. When publications are listed for more than one department of a government, they are arranged in the alphabetical order of the departments.

Speeches and statements by people other than Canadian Cabinet Ministers are included in the section on books and documents. The main indicator is the name of the speaker. The entry includes the title of the speech, the place at which it was delivered and the nature of the audience.

Unpublished material destined to become an article is included under books and documents until a reference to the published form is available. For example, an address to a learned society would be listed as an unpublished document until such time as this reference was superseded by one to a published article.

Theses are included in the section on books and documents, whether they are published or unpublished.

Articles

Articles are listed by date of publication. The entry consists of the author's name, the title of the article, the name of the publication, the volume number, the page reference and the date.

The volume number is usually in Arabic numerals, whether the publication used Arabic or Roman numerals for this purpose. The number of the issue is generally omitted. It is included only if it is needed to enable the reader to trace the publication to its source, or if there is no volume number.

An example of a standard entry for an article is:-

Tamaki, George T. The White Paper: Taxation of Foreign Source Income, Canadian Tax Journal 18:142-146, March-April 1970.

This means that George T. Tamaki wrote an article called "The White Paper: Taxation of Foreign Source Income," which was published in the Canadian Tax Journal, Volume XVIII in the March-April issue of 1970. It appeared on pages 142 to 146.

Speeches and statements by Canadian Cabinet Ministers

Speeches and statements by Canadian Cabinet Ministers are listed by date. Each entry gives the name of the speaker, his official title, a discussion of the subject covered, and the date and place of the speech or statement.

Address by Minister of Trade and Commerce to the Seminar on International Development, York University, Toronto, Nov. 6, 1967. Refers to Canadian investments abroad. Over past 3 decades these have grown faster than foreign investment in Canada. In U.S., other developed nations, and by end of 1964, direct investments in "Third World" over \$1 1/2 Billion. "Third World" could well become the fastest growing market before year 2000 - direct investment would result in larger markets abroad for Canadian companies.

Winters, Hon. R.H. Address by Minister of Trade and Commerce to a Meeting of the Export Advisory Council, Ottawa, Feb. 23, 1968. Our officials were authorized recently to take initiative in bringing foreign investment opportunities to the attention of Canadian firms where this appears to be in the national interest and to provide assistance as necessary. We are in addition exploring a number of new techniques to encourage Canadian private investment in developing countries, including a facility to insure such business against non-commercial risks.
